

**Dr. C. Preet Chahal, MD., FRCP(C), Dip. ABPN**

**Adult Neurology & Neuromuscular Medicine**

**Clinical Assistant Professor, Division of Neurology  
UBC Department of Medicine**

Dr. C. Preet Chahal joined Royal Columbian Hospital (RCH) in Fraser Health Authority as an Attending Neurologist in 2010. He is one of the founding members of the Fraser Health Stroke Service based at

RCH. His areas of clinical interest include neuromuscular diseases, headache disorders, stroke/vascular diseases and traumatic brain injury/concussion.

He is a Clinical Assistant Professor within the Division of Neurology at UBC Department of Medicine and is actively involved in medical education of students and residents. He is also the medical director of the Royal Columbian Hospital (RCH) Neurodiagnostics Program.

He is keenly involved in community initiatives to increase awareness of the neurological conditions with a goal of promoting timely access to care leading to improved outcomes.

**Session:** ***What is stroke and how is it managed?***

**Objectives:**

1. What are the different types of strokes?
2. Why is it important to actively manage chronic diseases (especially after minor stroke) to prevent major stroke?
3. What to expect from a stroke related hospitalization?
4. What to expect in the recovery phase after a stroke?
5. Real-life case scenarios

**Date:** Day 2 – Sunday, March 27, 2022
